

CPLS/CPLS ABRI

Energy saving and solar reflection for open roof structures

Enhancing the benefits of an open roof structure, CPLS and CPLS ABRI provide effective climate control. During the day the screen reflects sunlight to avoid overheating of plants. At night it helps the plants to retain their heat, saving energy and minimizing the formation of dew on the crop – reducing the risk of fungal diseases.

The screens are UV stable and remain clean and effective for a long time.

CPLS is for sliding systems, CPLS ABRI is for suspended systems.

- ☀ = Light transmission in sunlight
- ☁ = Light transmission when overcast
- ≡ = Energy saving

	☀	☁	≡
 CPLS 50 (ABRI)	49%	44%	55%
 CPLS 60 (ABRI)	35%	31%	60%
