

# COLS/COLS ABRI

## Shading and cooling for open roof structures

Enhancing the benefits of an open roof structure, COLS and COLS ABRI provide a level of climate control, improving the growing conditions. During the day the open structure provides shading and cooling, reducing plant temperatures. At night it helps the plants to maintain their temperature, minimizing the formation of dew on the crop and reducing the risk of fungal diseases.

The screens are UV stable and remain clean and effective for a long time.

COLS is for sliding systems, COLS ABRI is for suspended systems.

☀ = Light transmission in sunlight

☁ = Light transmission when overcast

||| = Energy saving

Warranty: 5 years under all types of greenhouse covering and 3 years with outdoor use, see Svensson's limited warranty for all terms, conditions and exclusions in writing.
