

LS ECONET AIR

Insect controlled ventilation

LS ECONET AIR is a pre-formed ventilation screen for keeping harmful insects outside the greenhouse and useful insects inside. The pleated structure and fine yarns effectively increases its airflow capacity, allowing greater ventilation without compromising insect control. It is available in 3 different hole sizes providing a secure barrier even to the smallest insects.

All Svensson insect screens are sold with hole sizes based on measurements taken from real insects. Thanks to the uniform weaving process, hole sizes are consistent across the entire screen. LS ECONET AIR is UV stable and highly resistant – providing a neat and durable solution.

☀ = Light transmission in sunlight

☁ = Light transmission when overcast

	☀	☁	HOLE SIZE MM
LS ECONET 1515 (AIR)	90%	79%	0.15x0.15
LS ECONET 4045 (AIR)	96%	88%	0.40x0.45
LS ECONET 7080 (AIR)	98%	92%	0.70x0.80

LS ECONET and LS ECONET AIR are made of similar base materials, therefore the light transmission values are the same. In practice there will be some reduction of the values for LS ECONET AIR because of the pleated structure.

Warranty: 5 years under all types of greenhouse covering and 3 years with outdoor use, see Svensson's limited warranty for all terms, conditions and exclusions in writing.
