

QLS ABRI

Retractable weather protection for outdoor crops

QLS ABRI is a retractable cover for sheltering crops against rain, hail and low temperatures. The cover is suspended on a low-sloped structure and each panel retracts into a small bundle. This design provides plants with maximum exposure to the outdoors when weather conditions are favorable. It is the ideal cover for protecting and hardening-off bedding plants, young plants and trees.

☀ = Light transmission in sunlight

☁ = Light transmission when overcast
