

LS SOLARWOVEN

Greenhouse shelter or sidewall

LS SOLARWOVEN is a reinforced transparent greenhouse cover. It blocks 90% of the sun's UV radiation and saves energy when used inside the greenhouse. Withstanding hail, downpour and wind, the cover is strong and tear resistant – with a longer life than most other greenhouse plastics.

This Svensson greenhouse cover is also used for roll up side walls both inside and outside as it does not stretch.

☀ = Light transmission in sunlight

☁ = Light transmission when overcast

≡ = Energy saving
